

Why check other countries?

Why should I select a search outside my territory?

Unless selected, Checks & Searches are only made within your territory. Many stolen items are shipped outside the original territory and sold for illicit gain internationally. You may be looking at a stolen product that is known to be stolen from its originating country and it has been shipped out to enable a sale. Boatfax's international database records thefts, lost and stolen vessels and equipment from around the world to deter the international trafficking of stolen items.
