

Check a boat by email

Do I have to use the on-line form to check the details of a boat or can I email the data to you?

You can email information, questions or registrations directly to us and we will advise you directly. If there is a cost involved you will be advised of this prior to proceeding so you can arrange payment before results are sent back to you. Please note that emailed requests can take up to 48 hours to process (Given this time delay we advise that you use the on-line form where possible). Emails should be sent to dataadmin@boatfax.com or click on the Contact Us link and fill in the form.
